Make A Plasticine Scene Decoration

Materials
-A small (5 inches) aluminum foil tart pan
-Plasticine or modeling clay in assorted colours
-A sharp pencil
-Ribbon, string or paperclip to hang decoration.

1. Use your fingers to spread Plasticine to cover the inside bottom of the pan. This will be the background of your scene. For example, a dark blue background can be a winter night sky.

2. Build up a picture by adding Plasticine shapes and textures to your background. Some suggestions: a snowman, Christmas tree, winter bird or animal, winter activity, or favorite holiday food. Use your imagination!

3. Carefully poke two small holes in the top side of the pan. Thread a ribbon through the holes to hang up your decoration. A silvery masterpiece!
